DESCRIPTION:
- El Rey Fog Kote provides cost-effective, durable and long lasting colored coating for existing stucco.
- Improves color uniformity, enhancing the beauty of stucco.
- Becomes an integral part of the stucco surface: fade resistant and vapor permeable, will not chip or peel like conventional paint, restoring the color and beauty of stucco.
- Available in all 30 standard El Rey Premium Stucco colors.
- Convenient to use and apply: mixes easily with water and can be applied to a wall with a standard portable pump/sprayer.

USE:
- A decorative coating for portland cement based stucco walls and ceilings.

COMPOSITION:
- Color: tinted to desired color. Meets SCAQMD Rule 1113 when using Parex USA Non-VOC Colorants
- VOC-Compliant
SPRAYER REQUIREMENTS:
- When spray applying coatings, it is important that the equipment being used can provide the output to support the selected tip, it is always best to have a sprayer with a higher output than the tip because as the tip wears, its orifice size becomes bigger and the material flow rate increases.
- Always test by spray applying the material on the surface while adjusting the fluid pressure to achieve proper fluid delivery and atomization.

SPRAYER SPECIFICATIONS:
- Airless Sprayer
- Minimum Graco XR7 Airless Sprayer (or equal) with a minimum 0.015 and maximum 0.019 tip-reversible for quick unclogging, referenced as 519 or 619.
- Flow Rate 0.31 GPM.
- Supports tip size up to 0.017 in.
- Operating pressure 3000 psi.

APPLICATION:
- Before applying this product, a sample should be applied and allowed to cure for color approval.
- While spraying use a circular motion when using a circular pattern tip, or alternate vertical and horizontal motions when using a fan pattern tip, holding the nozzle 18” from the wall.
- Apply end to end and top to bottom or to a prominent architectural break.
- Two coats are recommended to ensure complete coverage.
- Fog Kote over-spray, drips or spills should be removed immediately with water, or soap and water to prevent the possibility of permanent staining.

CURING:
- Lightly mist wall with water to dampen 24 hours after application of Fog Coat to assist curing – allow to dry.
- Repeat step one several times. This is essential during dry and/or hot weather.
- Complete curing requires several days, and normal chalkiness will decrease as curing takes place.
- The use of Parex USA Adacryl as described in the Mixing Instructions will reduce the occurrence of the normal chalkiness. Using the maximum amount of Acrylic Admix will eliminate the need to moist cure.

Note: Fog Kote is designed to revitalize existing stucco colors. To change colors or for application over smooth or unusual surfaces, use Parex USA Allegro II Cement Coating.

LEAD AND LEAD-BASED PAINT CONTENT DISCLOSURE
- Warn client of potential lead hazards
- Read complete Warning information printed on product container prior to use.
- For medical emergency information, call 1-800-424-9300.
- For more information on handling this product refer to its SDMS Sheet (SDS). The most current SDS and Product Data Sheet (PDS) can be found on our website.

This Product Data Sheet has been prepared in good faith on the basis of information available at the time of publication. It is intended to provide users with information about the guidelines for the proper use and application of the covered product(s) under normal environmental and working conditions. Because each project is different, Parex USA, Inc. cannot be responsible for the consequences of variations in such conditions, or for unforeseen.
